

# London Colocation

**Telephone House 69-77 Paul Street**

Accelerate digital transformation and global connectivity with a highly secure and interconnected infrastructure

## Overview

Epsilon Global Hub London serves as a vital interconnection facility for expanding your network footprint across Europe and other major cities. We cater to a diverse range of national and global companies, including service providers and media companies, by supporting their digitalisation and their growing connectivity needs.

With our global network fabric, you gain instant access to data centres, networks, clouds, internet exchanges and business partners around the world through our on-demand network orchestration capabilities.

Epsilon's colocation services ensure the utmost protection for your mission-critical data, offering leading security measures and operational reliability. We offer full suite options and meet-me rooms, along with a portfolio of security, support, and disaster management services for added assurance.

Through our efficient and seamless model, you can confidently grow your business and expand your reach to new markets.

## Features

- Connectivity to Data Centres Globally
- Managed Meet-Me Room (MMR)
- 24x7x365 Protection Delivered by Expert Engineers
- A Global Interconnect Fabric Including Service Providers, CSPs and IXs
- Customizable Private Suite/Private Cage and Standard Rack-Space
- 24x7x365 monitoring and site manning by trained security personnel
- TIA 942 Certified

with 99.999% Uptime

24x7x365  
Dedicated Global Support

10TB Global Optical Backbone

## Benefits

### Cost-Efficient

Enhance business efficiency and cost-effectiveness by utilising scalable interconnect solutions available at our colocation facilities

### Highly Secure

Ensure utmost security with our facilities that are equipped with redundant power supplies, multi-layered security measures, climate-controlled environments, and robust Service Level Agreements (SLAs)

### Widely Interconnected

Leverage our strategically located facilities to rapidly connect with our extensive ecosystem of network and partners

### Highly Customisable Options

Choose from a range of flexible and secure hosting options, from single racks to suite lines and cages, which can be easily scaled as your business expands

### 24/7 Monitoring & Management

Ensure maximum uptime and performance through maintenance and monitoring services available round the clock

### Reduced Complexity

Streamline your connectivity anywhere in the world and grow your global presence with Epsilon as your single provider of choice

“Epsilon Global Hub London is not only a highly secure colocation environment, but also highly connected for our customers and partners to rapidly access global infrastructure. We provide a one-stop solution for colocation and global connectivity to help businesses scale up and meet new demands seamlessly.”

#### Lee Prentice-Hall

Global Infrastructure Manager  
Epsilon

## Why Choose Us?

### Comprehensive Cloud Infrastructure

We are global experts in network infrastructure and cloud interconnect

### Consistent Global Hubs

Our facilities in Singapore, London, New York and South Korea offer the same sets of services with a familiar business model that makes it easy to scale up

### Simplified Operations

We reduce the number of service provider relationships by contracting with a single provider for your global infrastructure needs

### Customer Service Excellence

We offer the same Epsilon customer service excellence at each of our facilities around the world

### Rapid Global Delivery

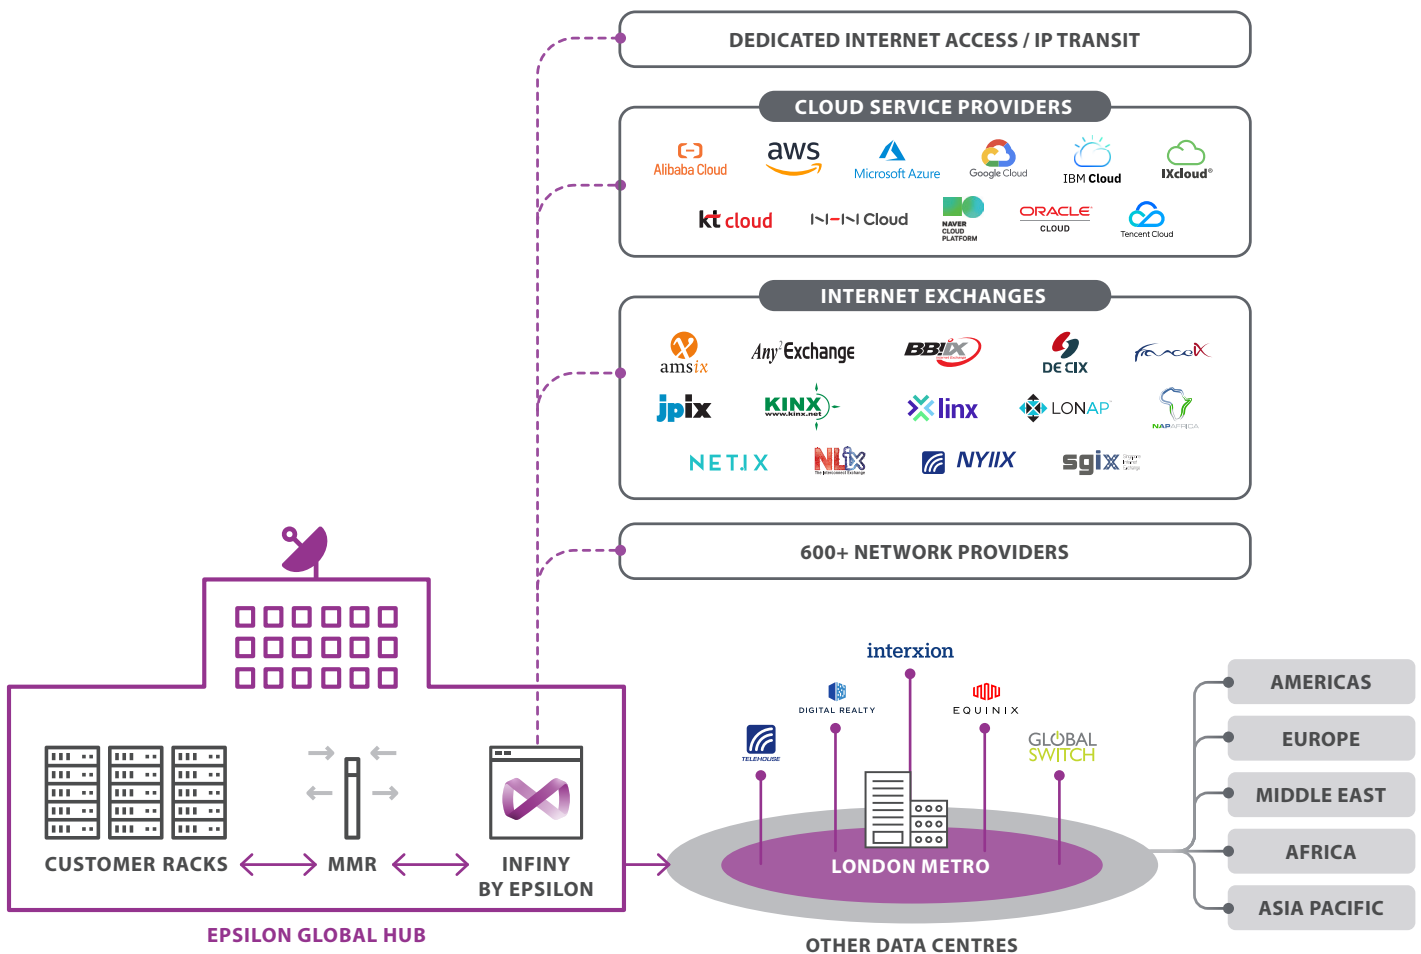

Our interconnection solutions can be combined with Colocation to enable you to rapidly roll out new services globally with maximum speed and efficiency

## Bespoke Solutions

Our Colocation solutions go beyond just our facilities. We can build and deploy solutions in data centres across the globe

## Market Place for Ordering

You can easily bundle other network services along with Colocation to maximise your return on investmentBespoke Solutions
