

Data Centre Interconnect

Boost efficiency and performance with on-demand interconnectivity

Overview

Epsilon's Data Centre Interconnect (DCI) leverages a MEF-certified global private network to facilitate seamless interconnections among data centres, clouds, network providers, and applications across the globe.

The solution effortlessly transcends geographical constraints through a singular connection, guaranteeing not only heightened performance but also enhanced reliability and security.

Elevate your end-to-end connectivity and experience the convenience of on-demand network provisioning, all managed through a single point of contact for all your networking needs. This streamlines your operations, ensuring efficient fulfilment of your connectivity requirements.

Features

- Connecting 500 data centres across 155 cities globally
- Scalable Ethernet bandwidth ranging from 2Mbps to 100Gbps
- MEF certified Carrier-grade network for all E-line Port and VLAN-based services
- Cloud-centric DCI ecosystem with on-demand service provisioning
- Real-time performance reporting through Infiny platform
- Robust SLA guaranteeing availability of up to 99.95%
- Options for both Protected and Unprotected service
- Benefits of point-to-point, point-to-multipoint, and multipoint-to-multipoint topologies

Today's Enterprise Needs

Efficient and streamlined connectivity management on a unified platform

•

Agile and on-demand service deployment for rapid global expansion

•

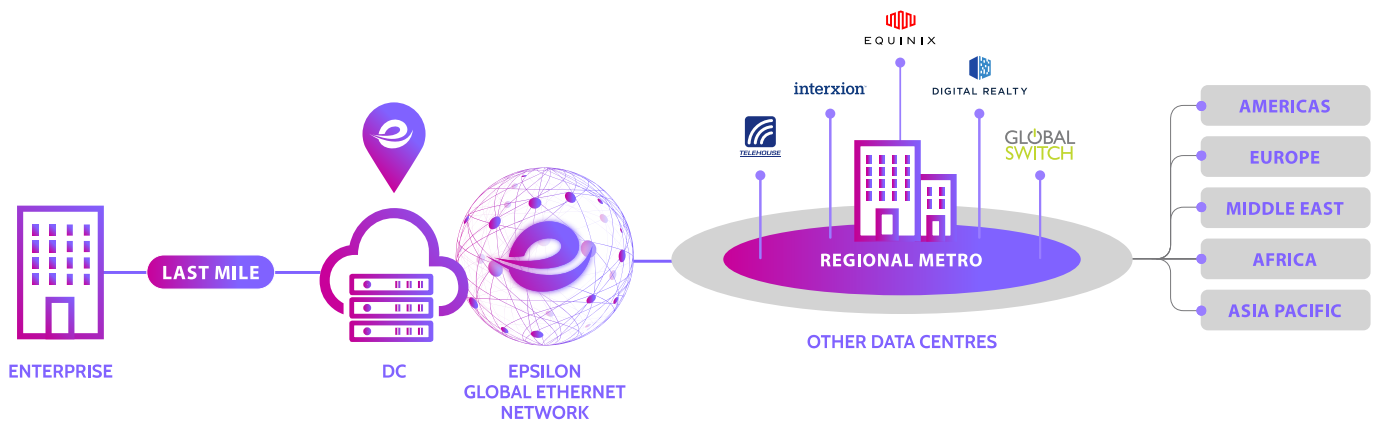

Seamless global coverage for establishing connections in new markets

•

Versatile interconnectivity options for reaching data centres, cloud providers and IXs

•

Expert service management and delivery to enhance productivity

Benefits

Rapid Connectivity

Instantly access world-leading Cloud and Internet Exchange Service Providers through on-demand Ethernet connectivity on our Infiny platform

Dedicated and Switched Options

Choose from both Switched and Dedicated Ethernet options to tailor the solution to your needs

Guaranteed Quality

Enjoy stable, low latency and low jitter connections with guaranteed throughput for time-sensitive applications, including storage and video

Simplified Operations and Control

Simplify Ethernet service procurement, easily scale your bandwidth with Infiny's click-to-connect provisioning, and effortlessly monitor and manage your network performance

API-enabled

Seamlessly integrate our on-demand Ethernet services into your existing platforms and solutions with our APIs

End-to-end Connectivity

Gain comprehensive global coverage, including seamless last-mile connectivity, through established Network-to-network Interfaces (NNIs) with partner networks

“With Epsilon’s DCI Ethernet service, we provide our partners with a simple and powerful approach to interconnectivity. Experience robust and on-demand global connectivity without the hassle of managing multiple relationships for a faster and more efficient DCI service.”

Emma Wang

Global Product Manager
Epsilon

Why Choose Us?

Unparalleled Global Reach

Benefit from our extensive and resilient network of 500+ Points of Presence, ensuring reliable connectivity even in far-reaching places

Large Ecosystem of Partners

Connect to world-leading Cloud, SaaS, and Internet Exchange providers via a single interface or NNI with our large ecosystem of trusted partners

Extensive Suite of Services

As one of the few global providers offering beyond data and cloud, to voice, satellite, and colocation, we can address all your global interconnectivity needs at scale

Award-winning Software-defined Network

Automate your international connectivity and extend your global reach with on-demand provisioning powered by real-time analytics and orchestration

Customer Service Excellence

Our team of global experts provides 24/7 technical and operational support to ensure quality service that you can rely on
