

South Korea Colocation

Digital-ro 31gil 61, Dream Mark 1 Datacenter, Guro-gu, Seoul

Highly connected infrastructure for low latency global interconnectivity

Overview

Epsilon's colocation service in South Korea is operated by KT Cloud, a subsidiary of KT Corp, South Korea's largest telecommunications provider. Our trusted carrier-neutral facility enables service providers and businesses to expand their network footprint globally.

Underpinned by our global network fabric and on-demand network orchestration capabilities, businesses can gain instant access to interconnected data centres, networks, clouds, internet exchanges and a diverse and dynamic ecosystem of leading providers and partners worldwide.

At Epsilon, we are your single provider for all your colocation needs. From a simple single cabinet to a complex, customised private cage or even security services, we have been trusted by businesses to meet their unique technical, operational, and security needs.

20+ Years of Experience

•
High Availability with 99.999% Uptime

•
On-demand SDN and NaaS Platform

•
24x7x365 Dedicated Global Support

•
10TB Global Optical Backbone

Benefits

Cost-efficient

Maximise your business efficiency with a cost-effective hosting facility that provides flexible and scalable commercial options

Highly Secure

Our facilities are protected with redundant power supplies, multi-layered security, climate-controlled environments and robust Service Level Agreements (SLAs)

Widely Interconnected

Our facilities are strategically located, enabling you to rapidly connect to our wide ecosystem of network and partners

Highly Customisable Options

We offer flexible hosting options that support scalability as your business grows

24/7 Monitoring & Management

We ensure maximum uptime with around the clock maintenance and monitoring

Reduced Complexity

Secure your connectivity anywhere in the world and grow your global presence with Epsilon as your single provider of choice

“Epsilon offers a one-stop shop for global connectivity and Colocation services. We enable our partners to deliver services globally and expand their presence, as and when they need it. We remove the barriers to growth with highly secure and highly connected Colocation solutions. It is an infrastructure that matches today’s demands.”

Lee Prentice

Global Infrastructure Manager
Epsilon

Why Choose Us?

Comprehensive Cloud Infrastructure

We are global experts in network infrastructure and cloud interconnect

Consistent Global Hubs

Our facilities in Singapore, Hong Kong, South Korea, London, and New York offer the same sets of services with a familiar business model that makes it easy to scale up

Simplified Operations

We reduce the number of service provider relationships by contracting with a single provider for your global infrastructure needs

Customer Service Excellence

We offer the same Epsilon customer service excellence at each of our facilities around the world

Rapid Global Delivery

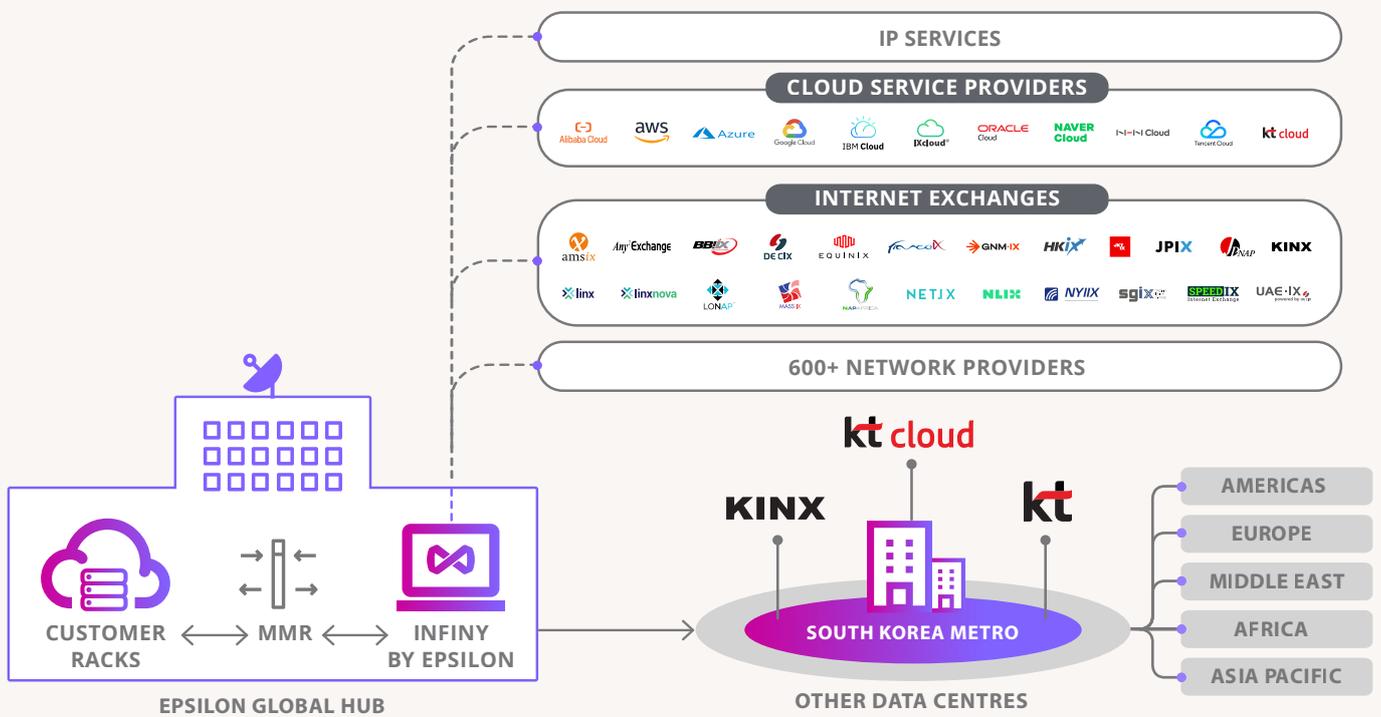

Our interconnection solutions can be combined with Colocation to enable you to rapidly roll out new services globally with maximum speed and efficiency

Bespoke Solutions

Our Colocation solutions go beyond just our facilities. We can build and deploy solutions in data centres across the globe

Market Place for Ordering

You can easily bundle other network services along with Colocation services to maximise your return on investment
