Infiny by Epsilon

Elevate your networking capabilities with an award-winning NaaS platform

Overview

Infiny by Epsilon Telecommunication is an award-winning on-demand interconnectivity platform that transforms the way you manage and scale your connectivity. Designed to cater to the needs of Enterprises and Service Providers, Infiny facilitates seamless access to a comprehensive suite of high-performance connectivity and communications services, all at the click of a button.

Users can effortlessly procure, request, and manage connectivity and communication services spanning local, regional and global scales. This diverse range of services includes Data Centre Interconnect, Cloud Connect, Remote Peering, Global Inbound Number services, and more.

Accessible via a user-friendly web-based portal or APIs, Infiny delivers the flexibility and scalability required to rapidly respond to new global demand while connecting and optimising applications and services. With Infiny, you gain extensive global reach, combined with unparalleled visibility and control to navigate your connectivity landscape with efficiency.

Features

- Intuitive user control through a portal-driven interface
- In-depth network analytics and customisable dashboards
- On-demand connectivity for a comprehensive suite of services on a single platform
- Guaranteed Quality of Service (QoS) and Experience (QoE)
- API-enabled platform for effortless integration
- Extensive interconnect fabric linking you to global Cloud, Data, and Voice Service Providers, and Internet Exchanges
- White-label and Channel Partner models
- Virtual interconnections through a marketplace for efficient data exchange and port procurement
- Flexibility to tailor bespoke pricing models to cater to different end-users

INFINY
BY EPSILON

Infiny is a Network-as-a-Service (NaaS) platform that enables users to provision and manage Layer 2 Cloud Connectivity through an intuitive web-based portal or APIs. It puts the power of the network directly in users' hands, allowing them to scale Cloud connectivity anytime, anywhere.

- A global interconnect fabric of data centres and networks
- Interactive analytics, graphing, and actionable insights
- On-demand connectivity to CSPs globally
- A simple self-service interface

Benefits

Self-service Efficiency
Provision and scale your connectivity with enhanced agility and flexibility, and retain 24/7 access to your services

Connectivity to Leading Service Providers
Connect directly to a large community of both leading and specialised Cloud Service Providers, plus peer at world-leading Internet Exchanges

Rapid On-demand Connectivity
Promptly serve the evolving needs of your customers with connectivity that can be provisioned at the click of a button

Enhanced Real-time Visibility
Monitor and control your services in real-time to ensure maximum uptime and enhanced connectivity

Guaranteed Quality Assurance
Get guaranteed end-to-end Quality of Service (QoS) and Quality of Experience (QoE) for an optimised experience for your end-users

API-enabled Integration
Seamlessly integrate Infiny into your existing infrastructure to leverage its capabilities for a cohesive and streamlined user experience

Why Choose Us?

Unparalleled Global Reach
Our extensive and resilient global network of Points of Presence, Cloud and Internet exchange on-ramp locations ensures reliable connectivity even in far-reaching places

Large Ecosystem of Partners
Connect seamlessly to world-leading Cloud, SaaS, and Internet Exchange providers through a single interface or NNI, leveraging our large ecosystem of trusted partners

Continuous Innovation
Infiny's on-demand ecosystem undergoes continuous enhancement to ensure quality services on an award-winning platform you can consistently rely on

Comprehensive Suite of Services
As one of the few global providers offering services beyond data and cloud, to voice, satellite, and colocation, we can meet all your global interconnectivity needs at scale
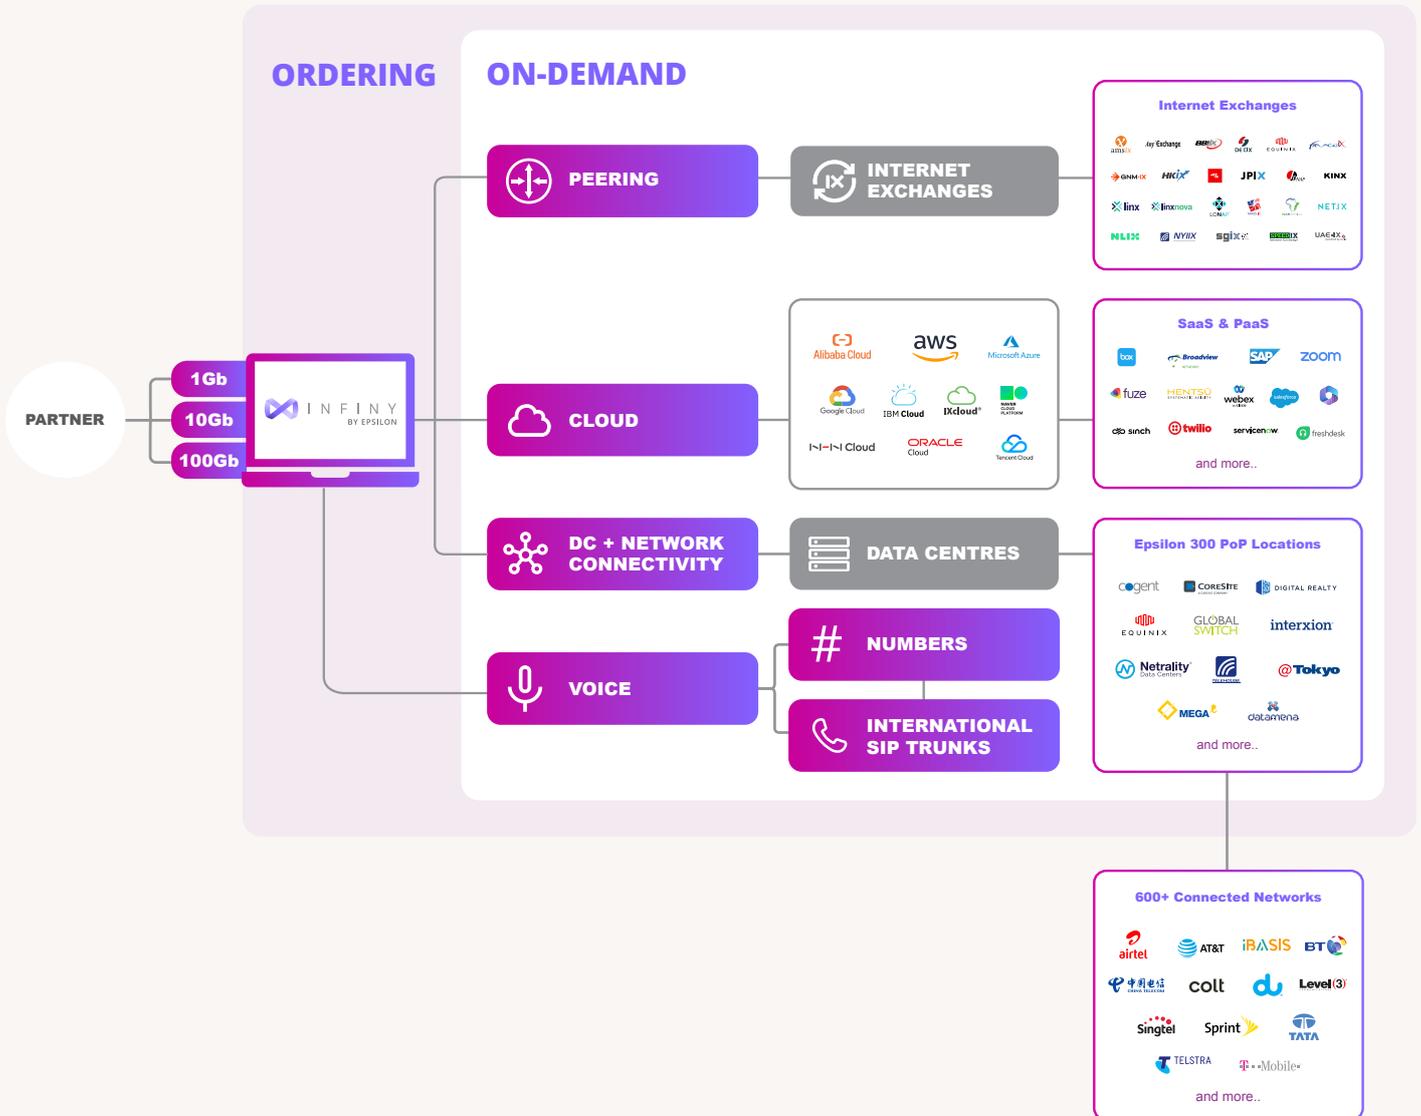

Customer Service Excellence
Our team of global experts provides 24/7 technical and operational support to ensure a standard of quality service you can trust

"Infiny by Epsilon transforms the way our partners connect to their services. The platform is designed to accelerate the procurement of connectivity services, coupled with greater visibility and control. Through the integration of flexible and agile APIs, we remove barriers between our partners and their services, enabling them to rapidly serve new demands."
