

IP Transit

Access the global digital ecosystem facilitated by the Internet through connecting your networks and equipment via IP Transit.

Overview

Epsilon's IP Transit service provides a streamlined solution for effortlessly expanding your global coverage, connecting geographically distributed operations, and ensuring high-performance Internet connectivity.

Gain access to the public Internet through reliable, flexible, and highly efficient global transit services. Our network is strategically designed to ensure fault resilience and excellent global IP coverage, with our established interconnections to Tier 1 transit providers and Internet Exchanges worldwide.

Additionally, Epsilon's IP Transit ensures constant access to your connected infrastructure for monitoring, configuration, maintenance, and upgrades.

Unlock the benefits of premium, scalable direct Internet connectivity, showcasing your digital environment and infrastructure to customers, partners, and the broader market with exceptional user experience and minimal latency.

Features

- Domestic and international peering options
- Service Level Agreements (SLAs) that encompass service delivery, service availability, Round Trip Delay (RTD), packet loss, and Mean Time to Restore (MTTR)
- Bandwidth options ranging from 2Mbps to 10Gbps (100Gbps available upon request)
- Route diversity achieved through direct interconnectivity to leading Internet Exchanges and multiple Tier 1 upstream Transit suppliers
- Access to global IP Transit via Epsilon's network in Asia, Europe and the Americas
- Multiple commercial offerings, including fixed and variable billing models

Today's Enterprise Needs

Seamlessly connect with international markets and expand business reach

•

Flexible networking solutions with adaptive scalability to adjust resources as required

•

Rapid and reliable access to data-intensive content for superior user experiences

•

Access the cloud and other digital business environments for enabling your business functions

•

Robust and resilient network architecture to support business continuity

Benefits

Enhanced Flexibility

Scale your connectivity with a variety of bandwidth options available to cater to your evolving business needs

Improved Performance

Achieve high availability and a highly resilient service with a robust and redundant network infrastructure

Streamlined Experience

Eliminate the need to manage multiple suppliers with a single provider for all your end-to-end connectivity requirements

Enhanced Connectivity

Access diverse, high-quality Internet routes and achieve improved network performance with reduced latency and packet loss

Global Coverage

Gain access to new markets, customers, and partners through direct connectivity to major IP network operators around the world

“Epsilon’s IP Transit simplifies Internet access, ensuring a dependable and low-latency user experience. Through direct peering, we enable our partners to offer their customers a premium experience, bringing Internet traffic closer to the content they seek.”

Peter Young
Global Product Manager
Epsilon

Why Choose Us?

Unparalleled Global Reach

Our extended and resilient network of over 500 Points of Presence ensures that you get reliable connectivity even in far-reaching places

Large Ecosystem of Partners

Connect to world-leading Cloud, SaaS, and Internet Exchange providers via a single interface or NNI with our large ecosystem of trusted partners

Extensive Suite of Services

As one of the few global providers offering beyond data and cloud, to voice, satellite, and colocation, we can meet all your global interconnectivity needs at scale

Award-winning Software-defined Network

Automate your international connectivity and extend your global reach with on-demand provisioning powered by real-time analytics and orchestration

Customer Service Excellence

Our team of global experts provide 24/7 technical and operational support to ensure a quality service that you can rely on
