

Colocation

Highly secure and interconnected data centre environment

Overview

Epsilon Colocation gives you the foundation you need to deploy, host, connect and manage your network, services and applications globally. Located in the leading business hubs of Singapore, London and New York, our facilities offer extended connectivity across a global network fabric of data centres as well as cloud service providers (CSP) and internet exchanges (IX).

We offer flexible colocation options with a portfolio of security and disaster recovery solutions. Scale your infrastructure at your own pace with full suite or ½ rack, supported by SLA-backed security and support services for added assurance.

Features

- Colocation Facilities in Singapore, London and New York
- Carrier-grade, next generation terabit optical global network
- Direct connection to world-leading CSPs, IXs and data centre locations
- High Availability with 99.999% Uptime
- Managed Meet-Me-Room
- Global Team of Experts
- 24/7 Dedicated Support
- Industry-certified colocation environment

Infiny by Epsilon is a Network as a Service (NaaS) platform for connecting and managing global connectivity via a web-based portal and APIs. It enables you to establish interconnection between our colocation facilities and global network fabric for direct connectivity to CSPs and IXs.

- 600+ Carriers, CSPs and IXs are part of our Interconnect Fabric
- 10TB Global Optical Backbone
- Automated registration to access colocation facilities

Benefits

Cost-Efficient

You can drive business efficiency with a cost-effective colocation facility with scalable interconnect solutions

Highly Secure

Our facilities are protected with redundant power supplies, multi-layered security, climate-controlled environments and robust Service Level Agreements (SLAs)

Interconnection Hubs

Our facilities have been strategically located in interconnection enabling you to rapidly connect to new and existing mesh of networks and partners

Highly Customisable Options

We offer flexible and secure colocation options from single racks to suite lines and cages that support scalability as your business grows

24/7 Monitoring & Management

We ensure maximum uptime with around the clock maintenance and monitoring

Reduced Complexity

Through a single relationship with Epsilon, you can grow your presence and connect to the world's communications hubs

“Our Colocation solution gives you an efficient and seamless model for growing your business and expanding reach into new markets, whilst maximising uptime and network availability in key global communication hubs around the world. When you choose Epsilon, you gain a team of networking experts that enable you to maximise the potential of your hosting.”

Lee Prentice-Hall

Global Infrastructure Manager
Epsilon

Why Choose Us?

Global Connectivity

Our depth of infrastructure around the world means you can rely on us to connect you with the same performance across the globe

Trusted Partner

We believe in strong partnerships and we have a track record of making our partners successful globally

Continual Innovation

Our solutions are always evolving to give our partners an exceptional user experience

A Growing Ecosystem

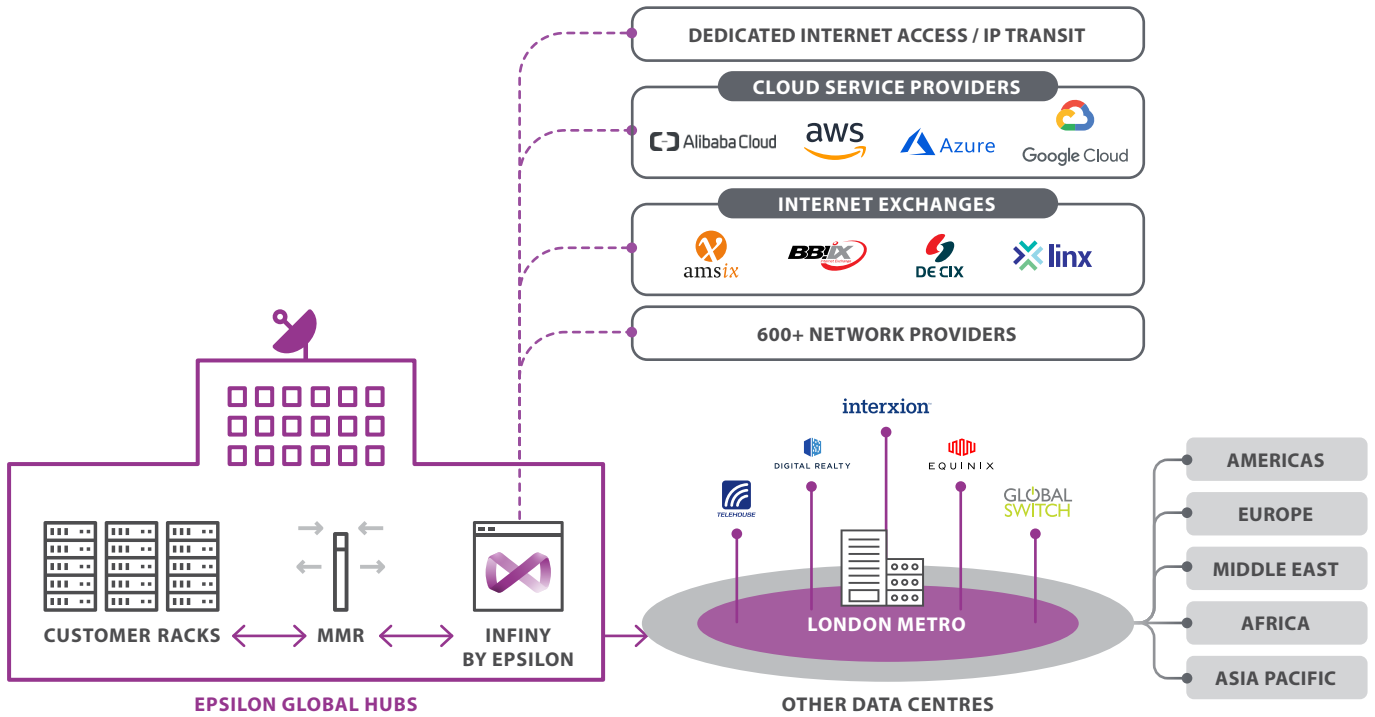

We are continually adding new CSPs and IXs to our ecosystem

Customer-Centric

Our team of global experts provide you with technical and operational support 24x7

Turnkey or Bespoke Solutions

Our team can design and build a full turnkey Colocation solution and project manage deployment to turn on and post acceptance
