Infiny by Epsilon

Cloud-centric networking provided by Infiny, a global connectivity platform

Overview

The Infiny by Epsilon on-demand connectivity platform brings networking into the Cloud era. It provides enterprises and Service Providers with a suite of high-performance connectivity and communications services at the click-of-a-button.

Infiny customers can use the portal-driven platform to order, activate and manage local, regional and global connectivity and communication services. Users can choose from a range of services from Data Centre Interconnect, Cloud Connect, Remote Peering and Global Inbound Number services. Infiny can be accessed via a web-based portal or APIs. No other platform offers the same global reach combined with unparalleled visibility and control.

Infiny delivers the flexibility, scalability and quality you need to rapidly serve new global demand while connecting and optimising applications and services.

INFINY BY EPSILON

Benefits

Self-Service
Access your services 24/7 with on-demand connectivity that can be provisioned at the click-of-a-button

World-Leading Service Providers
Infiny provides direct connectivity to Alibaba Cloud, Amazon Web Services, Microsoft Azure, Google Cloud Platform, IBM Cloud, Oracle Cloud and others as well as world-leading Internet Exchanges for direct peering

Increased Visibility
Monitor and control your services

Guaranteed Quality
Infiny offers guaranteed end-to-end Quality of Service (QoS) and Quality of Experience (QoE), ensuring an optimised experience for end users

On-demand Connectivity
You can quickly serve the changing needs of your customers with on-demand connectivity that can be provisioned at the click-of-a-button

API-Enabled
Infiny can be seamlessly integrated into your existing platforms and infrastructure

Why Choose Us?

Truly Global
Our Interconnect Fabric spans the globe, meaning you can connect global end-to-end services from a single platform.

Guaranteed Performance
Infiny is supported with intelligent networking technologies that deliver guaranteed quality across our global footprint

Comprehensive Solutions
Infiny gives access to Cloud, Voice and Data Connectivity from a single platform with the same user experience

A Simplified Approach
We remove the need to manage multiple service provider relationships with procurement happening in silos

New Control
Infiny puts control in your hands and enables you to procure and manage connectivity anytime and anywhere

New Modules
Epsilon will be adding new modules to Infiny to add to its on-demand ecosystem and offer new and existing partners a growing number of solutions

"Infiny by Epsilon transforms how our partners connect to their services. We developed this platform to accelerate how our partners buy services and give them new visibility and control. Infiny makes connectivity flexible and fluid with APIs that remove barriers between our partners and their services. It makes their businesses more agile and enables them to rapidly serve new demands."
