

Multi-Service Port

Global network connectivity via a single port connection.

Overview

Epsilon offers the ability to organise all of your connections from a single source via our ethernet Multi-Service Port and bring your network together into an easy-to-use Network-as-a-Service (NaaS) platform.

Available in 1GE, 10GE and 100GE capacity, through a single port we offer enterprises and service providers direct network access to the services they need. This includes the freedom to move the port to any location and flexibility to interconnect between data centres, directly connect to cloud service providers or even peer at an internet exchange. It also offer the ability to deploy SD-WAN links across enterprise locations. Instead of managing each resource separately, we bring everything together into a seamless and powerful networking resource.

Customers using our Multi-Service Port gain on-demand access to our carrier-grade global network fabric stretching across 280+ data centres in Asia Pacific, Americas, Europe, Middle East and Africa.

Epsilon Facts

600+ Carriers, Cloud Providers and Internet Exchanges are part of our Interconnect Fabric

280+ Points of Presence

More than 15 Years of Experience

High Availability with 99.999% Uptime

24x7x365 Dedicated Global Support

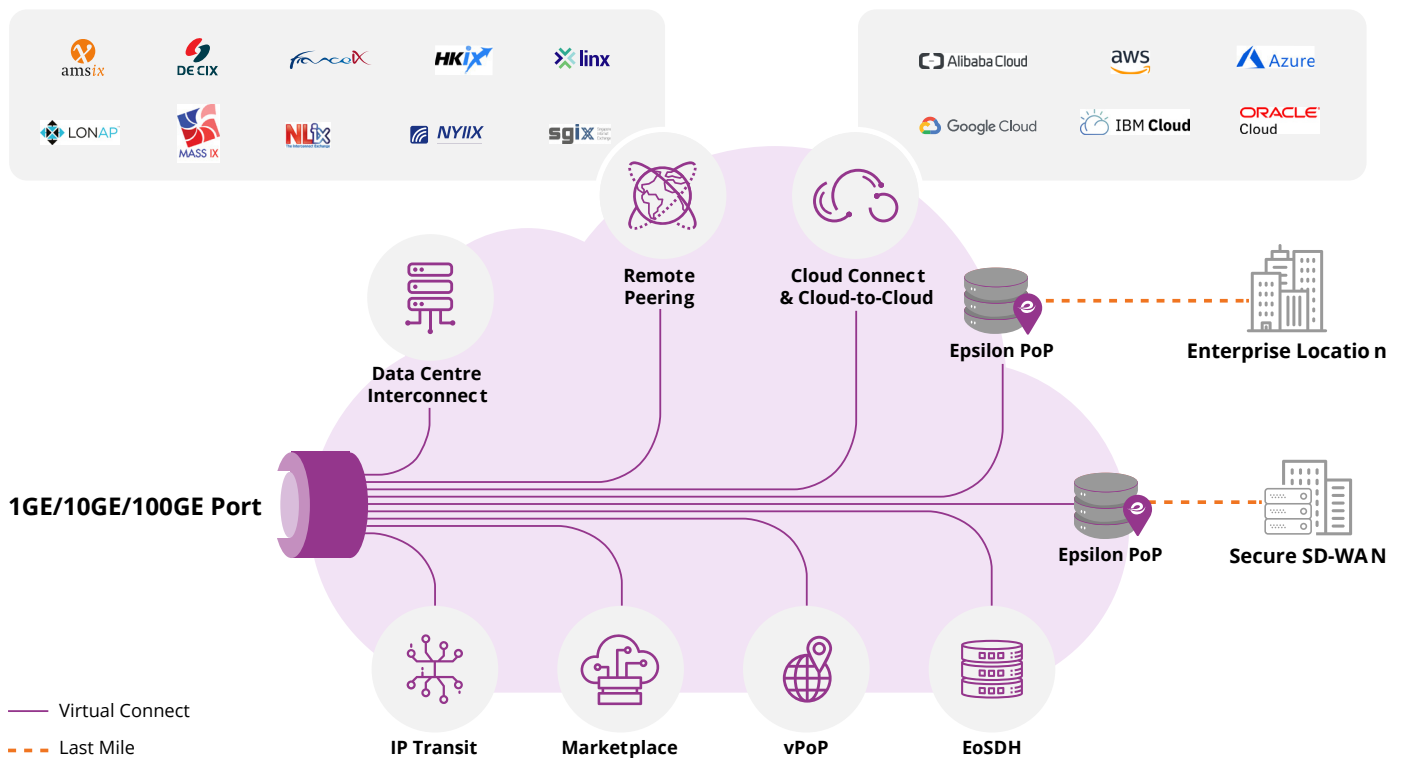

10TB Global Optical Backbone

How It Works?

A multi-service port acts as a gateway in connecting your applications and data. When you have a port with Epsilon, you can choose to deploy one or more virtual connect services.

Unlimited Port
Activate virtual connect to ANY ecosystem within Epsilon's network
Virtual connect terms: 1/12/24/36 months
All virtual connect services to: Data Centre Interconnect, Remote Peering, IP Transit, Marketplace, vPoP, EoSDH, SD-WAN, Last Mile, Cloud Connect and Cloud-to-Cloud

Unlimited Port

Services

- High-performance connectivity between global data centres**
 Connect your mission-critical workloads across metros, countries and continents at the click-of-a-button
- Scalable, private and secure connections to the cloud**
 Bypass the Internet and seamlessly connect your private infrastructure to the public cloud with our NaaS technology
- Connect to Internet Exchanges globally**
 Keep your traffic local and your latency low by accessing to the world's largest internet exchanges without the need for extra equipment or infrastructure
- Secure SD-WAN capabilities**
 Our SD-WAN service delivers the security, visibility, and control you need to connect and run your enterprise IT networks. We also offer simple, efficient and effective way to extend connectivity into last mile locations around the world
- Simple, efficient and effective last mile enterprise connectivity**
 Seamlessly connect multiple enterprise locations around the world from a single source and reduce deployment costs
- A marketplace for network interconnection**
 Our network fabric offers direct access to global service providers and enterprises through publicly available community ports, allowing you to reach new markets instantly
- Reliable, flexible and highly-efficient global transit service**
 Our network is designed for connections to multiple Tier 1 transit providers and internet exchanges, providing fault resiliency and extensive global IP coverage
- Be present without the physical infrastructure**
 We can enable you to set-up a virtual point of presence (PoP) instantly in any Epsilon's global PoP and connect to your end-users seamlessly

Benefits

Port Portability – Freedom to move your port to ANY location

Competitive Pricing

Cost Efficient

Reduced Complexity

1GE / 10GE / 100GE Port Availability

Why Choose Us?

Simplified Interconnection

Multiple virtual connect services can be provisioned via a single port

In-Depth Experience

More than 15 years of experience and expertise in delivering high-performance applications and communications.

Optimised End-to-End Solutions

A single relationship with us to connect and manage your virtual connect services end-to-end

A Flexible & Simple Model

We give you the flexibility and scalability you need to serve today's enterprise needs

“Enterprises and service providers today need a seamless way to procure and manage their network services. Our ethernet Multi-Service Port offers greater cost savings and improved operation efficiency. Through a single port connection, our customers can enjoy multiple services on our network with flexible and scalable bandwidth options up to 100G.”

Epsilon

Pricing

Port	MRC (USD)	NRC (USD)
100Mbps	\$325	\$0
1GE	\$325	\$0
10GE	\$450	\$0
100GE	\$950	\$0

Virtual Connect Services	Bandwidth	MRC (USD)
Metro	Up to 1 Gbps	\$75
Metro	1 Gbps < BW ≤ 10Gbps	\$150
International	Multiple Range	As per Infiny Portal

* The pricing above is applicable only for unlimited port.
